

## Simon Jufer

### Project Leader

---

Industrial engineer  
Executive Master of Business Administration (EMBA)

Simon Jufer specialises in electricity and gas market regulation, energy procurement, cost accounting, planning and controlling. Among other things, he advises and supports distribution network operators in determining electricity tariffs and preparing regulatory cost accounting, carries out projects to optimise the accounting structures of energy suppliers and deals with the transformation of gas networks.

Simon Jufer has been with Hanser Consulting AG since 2023. Prior to this, he was responsible for regulation and trading controlling at Energie Wasser Bern (EWB). In this role, he was responsible for the annual tariff processes and regulatory cost accounting for electricity, gas and district heating as well as for monitoring energy trading risks. His tasks included the development of a tariff system for district heating. During his work in regulatory controlling, Simon Jufer also gained experience in dealing with regulatory authorities. As a member of industry working groups, he was involved in drafting the industry recommendations for the liberalisation of the gas market.

Prior to this, Simon Jufer gained his first experience in the energy sector as a controller/management assistant at Regio Energie Solothurn. During the beginning of the liberalisation of the electricity market, he played a key role in setting up the regulatory cost accounting system and in restructuring the accounting system as well as the planning and reporting tools for the company. He conducted the economic feasibility study for the development of district heating supply. His broad range of responsibilities also encompassed project management and controlling as well as coordinating and supporting the strategy process.
